The Hiring Manager

ADVANCED WORLD SYSTEMS AND SOLUTIONS, INC.

Dear: Sir/Ma'am,

I am writing to express my interest in joining the technical team at Advanced World Systems and Solutions, Inc. as a Web Developer. As a final-year IT student at the University of Cebu – Main Campus, I have focused my development work on building functional, real-world applications, and I am eager to contribute to the team while continuously developing my professional skills.

Beyond my classroom training, I have gained practical experience developing systems for external clients. I was commissioned by a student-client from another university to build OrderClick, a platform designed to streamline their ordering processes. While this was a local-based project rather than a full deployment, it allowed me to sharpen my skills in TypeScript, PHP, Node.js, and MySQL while managing specific client requirements. Additionally, during my OJT, I contributed to web development tasks using WordPress and Elementor to build sites for real clients, and I independently developed MentorLog a system focused on managing and tracking mentorship interactions, which is currently being used by the company to handle their daily OJT operations and trainee logs.

Most recently, I served as the Lead Developer for our Capstone project, where I headed the creation of "Chrono Nav," a campus navigation app that uses OCR technology to automate student schedules. Leading this project helped me get comfortable managing a codebase using Git/GitHub and ensuring the UI/UX was polished using Canva and Figma. I am also experienced in WordPress for web management and modular system design.

I consider myself a diligent and coachable team member who is ready to adapt to your specific workflows. While I am highly interested in the Web Developer role, I am completely open to other technical positions if you see a better fit for my skills. I've attached my resume for your review and would appreciate the chance to discuss how my experience and work with client-based systems can contribute to your team.

Thank you for your time and for considering my application.

Sincerely,

ERIC DOMINIC MOMO

Applicant

ERIC DOMINIC MOMO

CAREER OBJECTIVE: A dedicated final-year IT student looking for a Web Developer role at Advanced World Systems and Solutions, Inc. I have experience building web applications and working with student-clients. I am eager to help the team while learning and growing my professional skills.

TECHNICAL SKILLS

- **Languages:** HTML, CSS, TypeScript, PHP, Python, Java, SQL
- **Frameworks & Libraries:** Node.js, Express.js, React, Bootstrap,
- **Tools & Platforms:** Git, GitHub, MySQL, XAMPP, VS Code, Figma, Canva, WordPress, Elementor
- **Methodologies:** OOP, SOLID & SEO Principles, MVC Architecture

PROFESSIONAL PROJECTS & EXPERIENCE

Order Click (External Student-Client Project) | May 2025 – Present

- Commissioned as a freelance developer by a student-client from another university to build a platform designed to streamline their ordering processes.
- Managed the full development lifecycle in a local environment, utilizing TypeScript, PHP, and MySQL to meet the client's specific requirements.
- Focused on translating external student needs into a functional digital solution and providing ongoing refinements to the system.

Mentor Log (OJT Project) | Feb 2026 – April 2026

- Developed a centralized system to manage and track mentorship interactions and trainee logs during my internship.
- Currently used by the company on their local network to handle daily OJT operations, replacing manual documentation with an automated digital workflow.
- Focused on database reliability and secure access for administrative users.

CHRONONAV – Campus Navigation & Scheduling App (Capstone Lead Developer) | Aug 2025 - Dec 2025

- **Lead Developer:** Directed the technical architecture, ensuring a stable backend and seamless integration of campus data.
- **OCR Integration:** Implemented Tesseract OCR technology to scan and convert student study loads into digital schedules, linking them directly to navigation maps.
- **Cross-Functional Leadership:** Collaborated with UI/UX designers to translate high-fidelity Figma prototypes into a functional, user-friendly application.

Inventory Management System | March 2025 – May 2025

- Built a Web app inventory tool allowing admins to track stock levels and update product movements in real-time.
- Architected a structured MySQL database to provide fast history lookups, significantly reducing the time spent on manual inventory audits.

EDUCATION

University of Cebu – Main Campus | Cebu City, Philippines

- *Bachelor of Science in Information Technology* | **4th Year (Current)**
- Expected Completion: June, 2026

CERTIFICATIONS

Cisco Certified Network Associate (CCNAv7)

- *Switching, Routing, and Wireless Essentials* | Jan 2025
- *Introduction to Networks* | June 2024
